

# SMARTCOTE® EXTRA

## NuTech's Commitment to Soybean Seed Treatment

To provide the best combination of insecticide, fungicide, and other seed treatment amendments available that complement NuTech's unique genetics and industry-leading traits.

- EverGol Energy is a next-generation fungicide seed treatment technology which provides **three modes of action** for enhanced protection across a broad spectrum of early season diseases
- Delivers improved control of Rhizoctonia and Fusarium
- EverGol Energy was selected based on extensive research evaluations across different growing conditions and environments

- **POSITIVE SOYBEAN YIELD ADVANTAGE** at 27 of 30 research locations
- Average of **1.4 BU/A YIELD ADVANTAGE** across all locations

Gaicho®	INSECTICIDE
<b>EXCLUSIVE</b> Evergol Energy®	FUNGICIDE
Allegiance®	FUNGICIDE (Metalaxyl)
<b>EXCLUSIVE</b> PA2030	BIOLOGICAL

### PA2030 Biological Components

PA 2030 amplifies the traditional plant growth process.

- Microbials multiply in the area around the soybean seed at germination
- Microbials produce plant hormones that trigger root growth and nodulation
- Increased root growth leads to more surface area for greater nutrient uptake
